Teaching Experience

Crime by the Numbers

This book introduces the programming language R and is meant for undergrads or graduate students studying criminology. R is a programming language that is well-suited to the type of work frequently done in criminology - taking messy data and turning it into useful information. While R is a useful tool for many fields of study, this book focuses on the skills criminologists should know and uses crime data for the example data sets.

Other Experience

- 2018 - 2020 **Data Scientist Consultant, Philadelphia City Commissioner Al Schmidt.**
 Wrote and tested code to efficiently convert millions of pages of PDFs into a machine-readable format. Designed, implemented, and maintained a website that allows users to visualize this data at various levels of aggregation.
- 2018 **Data Scientist**, Fels Institute of Government, University of Pennsylvania.

- Produced and tested code to convert voting records into a machine-readable data and built a prototype website to display this data.
- 2017 - 2018 **Research Analyst**, National Archive of Criminal Justice Data (NACJD).
Wrote the Justice Data Learning Guide: No. 2, "[Using the Law Enforcement Agency Identifiers Crosswalk \(LEAIC\)](#)." This guide explains how to use the LEAIC dataset through an example incorporating both National Incident-Based Reporting System (NIBRS) data and US Census data. This guide includes code to use in both R and SPSS.
- 2016 **Research Assistant**, Dr. Emily Owens, University of Pennsylvania.
Collected, cleaned, and prepared Census data for analysis and visualization.
