Teaching Experience

Crime by the Numbers

This book introduces the programming language R and is meant for undergrads or graduate students studying criminology. R is a programming language that is well-suited to the type of work frequently done in criminology - taking messy data and turning it into useful information. While R is a useful tool for many fields of study, this book focuses on the skills criminologists should know and uses crime data for the example data sets.

Other Experience

2018 - 2020 Data Scientist Consultant, Philadelphia City Commissioner Al Schmidt.

Wrote and tested code to efficiently convert millions of pages of PDFs into a machine-readable format. Designed, implemented, and maintained a website that allows users to visualize this data at various levels of aggregation.

2018 **Data Scientist**, Fels Institute of Government, University of Pennsylvania.

Produced and tested code to convert voting records into a machine-readable data

and built a prototype website to display this data.

2017 - 2018 **Research Analyst,** National Archive of Criminal Justice Data (NACJD).

Wrote the Justice Data Learning Guide: No. 2, "<u>Using the Law Enforcement Agency Identifiers Crosswalk (LEAIC)</u>." This guide explains how to use the LEAIC dataset through an example incorporating both National Incident-Based Reporting System (NIBRS) data and US Census data. This guide includes code to use in both R and SPSS.

2016 **Research Assistant,** Dr. Emily Owens, University of Pennsylvania.

Collected, cleaned, and prepared Census data for analysis and visualization.
